

THE STATE OF VERMONT'S CHILDREN

2025 YEAR IN REVIEW

ABOUT THIS YEAR'S REPORT

The 2025 *State of Vermont's Children: Year in Review* report introduces a streamlined format focused on statewide and regional profiles. These profiles provide a snapshot of selected indicators related to child and family well-being across Vermont. (See pages 6-18.)

This year's report also highlights Vermont's Early Childhood Strategic Plan, which sets shared goals and priorities for the early childhood system over the next five years. (See page 4.)

Where Did the Rest of the Data Go?

To keep the printed report concise, data that appeared in previous editions now live in Vermont's Early Childhood Data Portal, part of Vermont's Early Childhood Data & Policy Center. This approach allows the report to focus on key findings, while ensuring that detailed, up-to-date data remain publicly available year-round.

What Is Vermont's Early Childhood Data Portal?

Vermont's Early Childhood Data Portal is an easy-to-use tool that brings together reliable data on young children, families, and the early childhood system.

The portal uses clear visualizations to show trends over time and differences by region. Users can download full datasets and review data notes and sources. New data is added regularly.

The Data Portal helps users:

- Track trends and regional differences
- Identify disparities and gaps
- Inform policy, funding, and program decisions

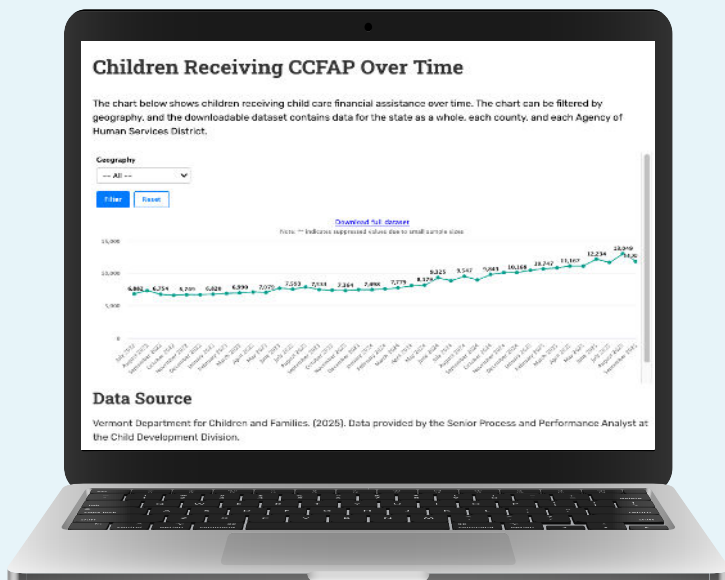

By centralizing data, the portal makes information easier to find, understand, and use. The Data Portal supports a range of users:

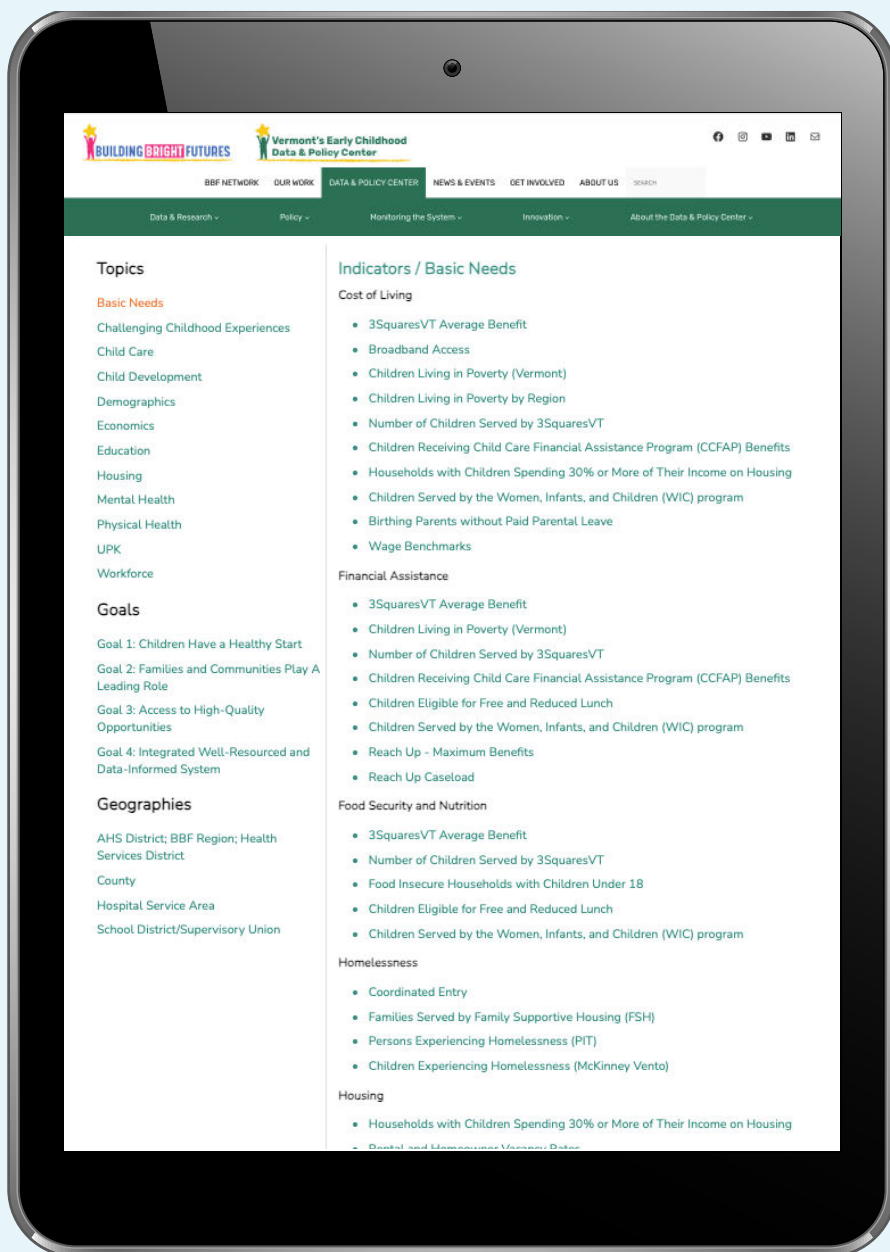

- Legislators and members of the Administration can use it to inform policy and budgets.
- Community organizations, advocates, and family leaders can find data to support them in planning and help them craft legislative testimony.
- Funders and donors can use it to better align their investment with community needs.

What You'll Find

Data are organized across key areas of child and family well-being, including:

- Basic needs and economic security
- Child care and early learning
- Health and well-being
- Housing stability
- Safety, special education, and early intervention

How to Use the Portal

1. Choose a topic or geography.
2. Select an indicator to view trends and comparisons.
3. Download data or read definitions and sources.

Users can explore multiple indicators to understand how systems connect.

VERMONT'S EARLY CHILDHOOD STRATEGIC PLAN 2030

EXECUTIVE SUMMARY

Vermont's Early Childhood Strategic Plan 2030 provides a shared vision and roadmap to ensure every child in Vermont, from the prenatal period through age 8, has the resources, opportunities, and support to thrive. The Plan is guided by Building Bright Futures' (BBF) legislative mandate to steward Vermont's early childhood system and was developed in partnership with The Creative Discourse Group (TCDG), the State Advisory Council, and partners across the state.

Released in 2025, this update builds on the 2020 Vermont's Early Childhood Action Plan (VECAP) and reflects what families, caregivers, and early childhood professionals shared through intensive engagement. Nearly 200 Vermonters contributed through conversations, letters, and storytelling. They included parents, grandparents, kinship and foster caregivers, educators, health providers, and community leaders. Their input was paired with analysis of 49 statewide planning documents and needs assessments to ensure the goals are both community-driven and evidence-based. Partners also shaped iterative revisions, refining language, strengthening priorities, and ensuring the Plan reflects Vermont's diverse perspectives and expertise.

The Strategic Plan centers equity, belonging, and justice. It celebrates the strengths and resilience of Vermont families while confronting systemic barriers such as high costs of living, housing shortages, limited access to health and child care, and discrimination. Families emphasized that they are not seeking handouts. They want responsive and culturally affirming systems that honor their expertise and support their children's success.

Six foundational principles shape the Strategic Plan and its implementation: (1) Families and caregivers are leaders and central to decision-making, (2) Equity and justice are non-negotiable, (3) Brain and developmental science guide our work, (4) Action steps build on community strengths and resilience, (5) Bold, achievable goals drive collective action, (6) Accountability, transparency, and continuous improvement are essential.

This plan offers a collective direction and measurable steps to move toward a Vermont where every child and family experiences equity, belonging, and justice. The vision for 2030 is that:

- Children and families consistently have their basic needs met, including stable housing, nutritious food, income, and transportation.
- Children grow up in safe, healthy, and nurturing environments that promote healing and resilience.
- Children and families gain access to inclusive, high-quality opportunities that support their development and well-being.
- Children are cared for by a well-prepared, well-supported, and equitably compensated early childhood workforce.
- Vermont's early childhood system is family-centered, coordinated, well-resourced, and data-driven.

To move toward this vision, the Plan identifies five strategic goals, each paired with example actions that demonstrate how progress can be made.

Goal 1: All Children and Families Have Their Basic Needs Met.

Children cannot thrive without stable housing, food, income, and transportation. The stress of being unable to meet basic physiological needs such as food and shelter, often due to poverty, impacts parents' and caregivers' capacity to create environments that support early childhood development. To advance this goal, Vermont must develop and expand financial supports, implement paid leave and family-friendly workplace policies, remove barriers that limit access to basic resources, and address the needs of those most impacted by economic insecurity.

Goal 2: All Children Are Raised in Safe, Healthy, and Healing Environments.

Every child should grow up in conditions that support health, safety, and resilience. Stable, nurturing environments help children thrive in school, build strong relationships, and grow into

healthy adults. Unsafe or unstable settings, trauma, and poor health can disrupt development and increase risks of chronic illness, mental health challenges, academic struggles, and involvement in child welfare or justice systems. To advance this goal, Vermont must invest in preventative health care, ensure access to health insurance, build emergency preparedness and climate resilience, invest in community infrastructure such as parks and broadband, and center racial equity in the child protection and health and human services systems.

Goal 3: All Children and Families Have Access to High-Quality Opportunities That Promote Child Development and Well-Being.

Every child deserves access to opportunities that nurture their physical, social-emotional, and intellectual growth. Early experiences and relationships are the foundation of healthy development, preparing children for success in school and life. Without access, too many children miss critical developmental supports, deepening disparities in learning and long-term well-being. To advance this goal, Vermont must increase equitable access and affordability of early childhood education through a coordinated mixed-delivery system, increase inclusion for children with disabilities and developmental delays, ensure access to early intervention and special education, provide support and resources to early childhood education programs and schools, and reduce or eliminate exclusionary discipline in early childhood settings.

Goal 4: All Children Are Supported by a Well-Prepared, Well-Supported Early Childhood Workforce.

The early childhood workforce is essential to the health and success of children, families, and communities. A strong workforce not only ensures high-quality care and learning but also underpins Vermont's economy by enabling parents

to work and employers to thrive. Without equitable pay, professional recognition, and long-term investment, the state risks ongoing shortages, instability, and lost opportunities for children and families. To advance this goal, Vermont must expand access to affordable, high-quality training, education, and professional development for the early childhood workforce; increase compensation and benefits to allow workers to meet their basic needs and to thrive; and engage in effective recruitment and retention tactics to attract a broad, stable, diverse workforce.

Goal 5: Our System Centers Children and Families and Is Coordinated, Well-Resourced, and Data-Driven.

Families and caregivers must hold real power in shaping decisions, and families' transitions across systems must be smooth and coordinated. Caregivers are experts on the care, services, and supports each family member needs, and their voices should guide the policies, practices, and investments that shape their lives. High-quality, up-to-date data is an essential tool for learning about and responding to the needs of children and families statewide. To advance this goal, Vermont must involve families in leadership and decision-making, improve transitions among services, invest in improvements to data systems, and promote collaboration among early childhood leaders.

This Plan is a shared tool for families and caregivers, policymakers, advocates, educators, researchers, and business leaders to work from a common vision. It sets clear objectives and flexible strategies to guide investments, align priorities, and track progress through 2030. Vermont's children cannot wait. The Strategic Plan represents a collective commitment to build a just, inclusive, and resilient early childhood system where every child and family has the opportunity to thrive.

GOALS

Introduction to Regional Profiles

The following regional profiles offer a snapshot of selected indicators of child and family well-being for each of Vermont's 12 regions, which line up with the Agency of Human Services Districts. Each indicator represents the most high-quality, up-to-date data that is available at the regional level.

This report draws from multiple sources of Vermont data, not all of which use the same geographic boundaries. Several indicators are only available at the county or supervisory union/school district level. When necessary, multiple areas are included to provide a more inclusive picture of the region.

The data on this page is for the entire state of Vermont:

CHILD CARE FINANCIAL ASSISTANCE (CCFAP) ENROLLMENT BY AGE⁷

CHILD POPULATION¹ (2024)

57,696 children under 10

Decreased from 60,141 in 2019²

VERMONT'S EARLY CHILDHOOD DATA & POLICY CENTER

The Center is a nonpartisan, independent source of data, research, and policy guidance focused on young children and families, from the prenatal period through age 8.

The Center supports informed decision-making by centralizing data, translating research, and advising partners across Vermont's early childhood system.

POLICY

The Center provides nonpartisan policy analysis and advisement to advance measurable progress for children and families, including:

- Annual Policy Recommendations aligned with Vermont's Early Childhood Strategic Plan
- Advisement to Vermont's Legislature, Governor, and Administration on issues affecting young children and families

REPORTS & RESOURCES

The Center produces and curates data-informed resources to support planning and action, including:

- *The State of Vermont's Children*, published annually
- Data briefs, needs assessments, and directories

MONITORING & INNOVATION

The Center produces and curates data-informed resources to support planning and action, including:

- Monitoring implementation of Act 76, Vermont's child care law
- Early Childhood Grand Rounds webinars
- Data integration and alignment across systems
- Leadership of Vermont's Early Childhood Strategic Plan Goal 5: Data-Driven Decision-Making

VERMONT'S EARLY CHILDHOOD PORTAL

The Early Childhood Data Portal is a tool for accessing reliable, up-to-date data on Vermont's children, families, and early childhood system.

Data are presented through clear, easy-to-use visualizations, with options to download full datasets. The portal is updated regularly to support policy, program, and community use.
